ROCKETBOX 3.0

Built for Infused Material.

\$19,995

Infused pre-rolls now drive nearly half the category, and you can't capture that demand on a machine that chokes on homogenized material. The RocketBox 3.0 fills up to 453 cones per cycle, up to 20,000 per day with one operator, with 5x the power for the oil-infused, homogenized flower that stalls machines built for dry flower.

Every RocketBox 3.0 includes both. Run it either way.

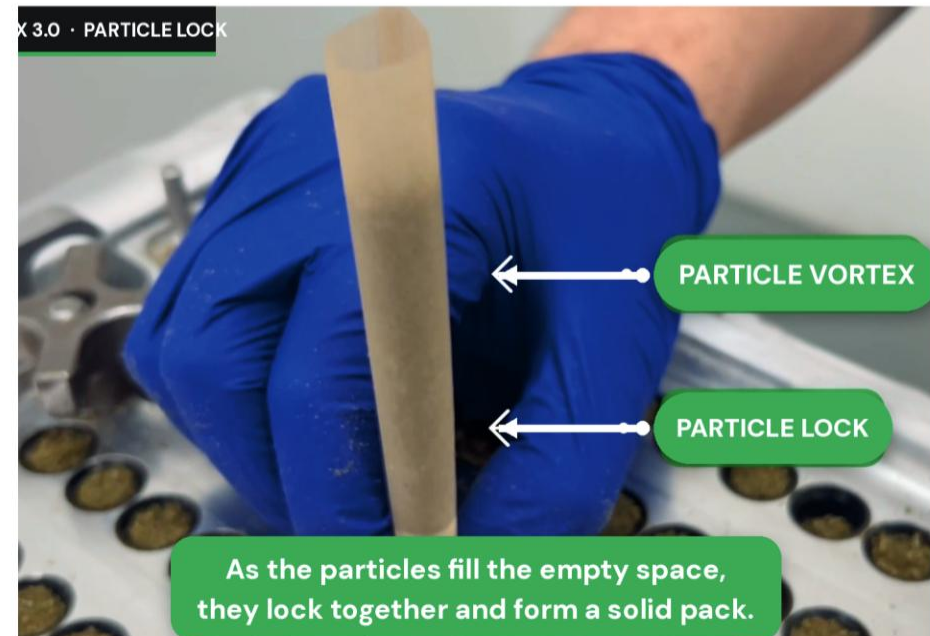

OPTION 1	OPTION 2
453-JOINT TRAY	ADAPTER PLATE + TWO 72 OR TWO 143-JOINT TRAYS
<p>Maximum throughput per cycle.</p> <ul style="list-style-type: none"> • Fill 453 cones in a single cycle, the highest per-cycle output on the RocketBox 3.0. • Built for operations focused on raw volume: fill fast, pack in bulk, close downstream. • One operator. Up to 20,000+ joints per day. • Best for: high-volume producers maximizing fill cycles who close and finish separately. 	<p>One-Tray Workflow compatible.</p> <ul style="list-style-type: none"> • The adapter plate fits in the same slot as the 453 tray and holds two trays simultaneously. • Two 72-joint trays feed the One-Tray Workflow: fill one, pass it to the Cone Lander, LaunchPad Scale, or Atomic Closer, fill the second while the first travels down the line. • Two 143-joint trays pack the most joints per run when you close separately. • No reloading. No joint transfers. One continuous automated line. • Best for: producers connecting fill, weigh, and close, or running high-volume batches.

Machine Features

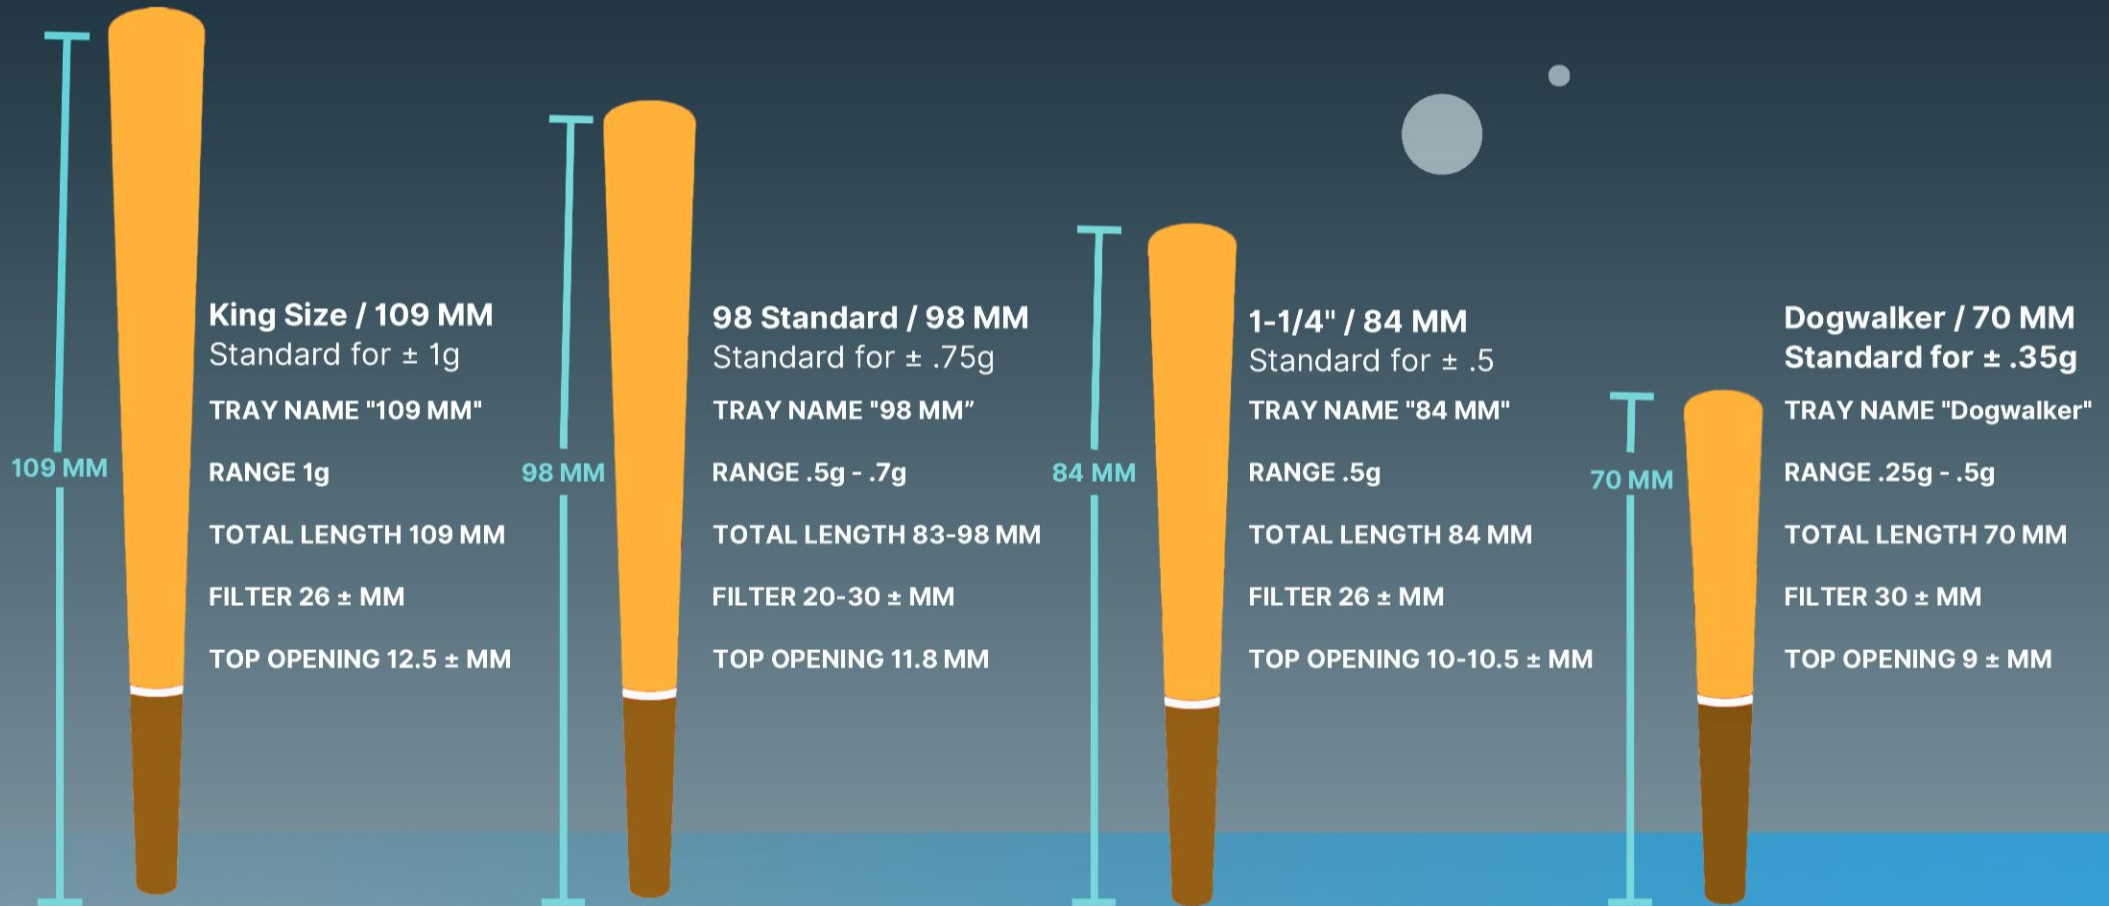

- Particle Lock packs each cone with a controlled swirling vortex, no tamping, for even density even with heavy infused, homogenized material.
- 5x more powerful than the Mini-RocketBox, built for the infused, homogenized flower that stalls machines made for dry flower.
- The most versatile RocketBox, alongside the 2.0. Runs every STM tray size (72, 143, 453-joint) and cone size (70mm to 109mm Plus).
- Easy to run, easy to clean. Onboard video training gets operators up to speed, and the machine breaks down for cleaning in minutes.
- Onboard or external air, Smart Density auto-weighting, and the exclusive lift plate for consistent weights with no re-weighing.

Specifications

Price	\$19,995. Financing and payment options available.
Output	Up to 453 per cycle Up to 2,500/hr 20,000+ joints per day
Tray Options	453-joint tray (max volume), or adapter plate with two 143-joint or two 72-joint trays
One-Tray Workflow	Yes, with adapter plate and two 72-joint trays. Compatible with Cone Lander, LaunchPad Scale, and Atomic Closer
Cone Sizes	70mm, 84mm, 98mm, 109mm
Dimensions	30" W x 22.25" D x 65" H
Operators Required	1
Warranty	1-year parts and labor
Origin	Made in USA - Spokane, WA
Power	110V / 220V

STM COMPATIBLE CONES

Operators can adjust weights within specified ranges by raising/lowering the Top Tray, modifying grind size, bulk density, or machine cycle time. Papers should at least match the dimensions listed for optimal results. The Top Tray's metering system are optimized for standard sizes (84/98 MM & 109 MM), and custom sizes like Dogwalker & others may require additional tuning.

REVOLUTION 2.0

GRIND.

Grind size is the most important for a superior pre-roll. The STM Canna Revolution 2.0 Grinder: Precision in every grind.

OPTIONAL EQUIPMENT

FOR USE IN THE ONE-TRAY WORKFLOW

LAUNCHPAD SCALE

WEIGH.

Precise weights save time and money. Invest in a lab grade scale to elevate precision in measuring.

ASTRO INFUSER 2.0

INFUSE.

Enhance your profits significantly with oil infused pre-rolls with the Astro Infuser, the world's fastest.

ATOMIC CLOSER 2026

CLOSE.

Precise weights save time and money. Invest in a lab grade scale to elevate precision in measuring.
