

ASTRO INFUSER 2.0

AUTOMATED HASH HOLE & INFUSED PRE-ROLL MACHINE

Produce hash holes, donut joints and infused pre-rolls
with repeatable dosing at commercial scale.

UP TO 72 PRE-ROLLS INFUSED IN ~90 SECONDS.

12-point simultaneous injection • Programmable dosing • Programmable core placement

Built to Scale Infused Pre-Roll Production

Move beyond manual infusion with programmable control over concentrate amount, temperature and core placement. Astro Infuser 2.0 injects 12 pre-rolls simultaneously and completes a 72-count tray in about 90 seconds.

Why Astro Infuser 2.0

- 12-point simultaneous concentrate injection
- Programmable dose from 0.05–3.2 g
- Control core placement and length
- Temperature control up to 198°F
- Save up to 20 production recipes
- Rosin, live resin, distillate & compatible concentrates
- No nitrogen or compressed air required
- 1-year warranty with STM premier support

\$69,000

Key Features & Specs

Speed & Throughput

- Up to 72 pre-rolls in ~90 seconds*
- 12-point simultaneous concentrate injection
- 1,000 mL heated reservoir

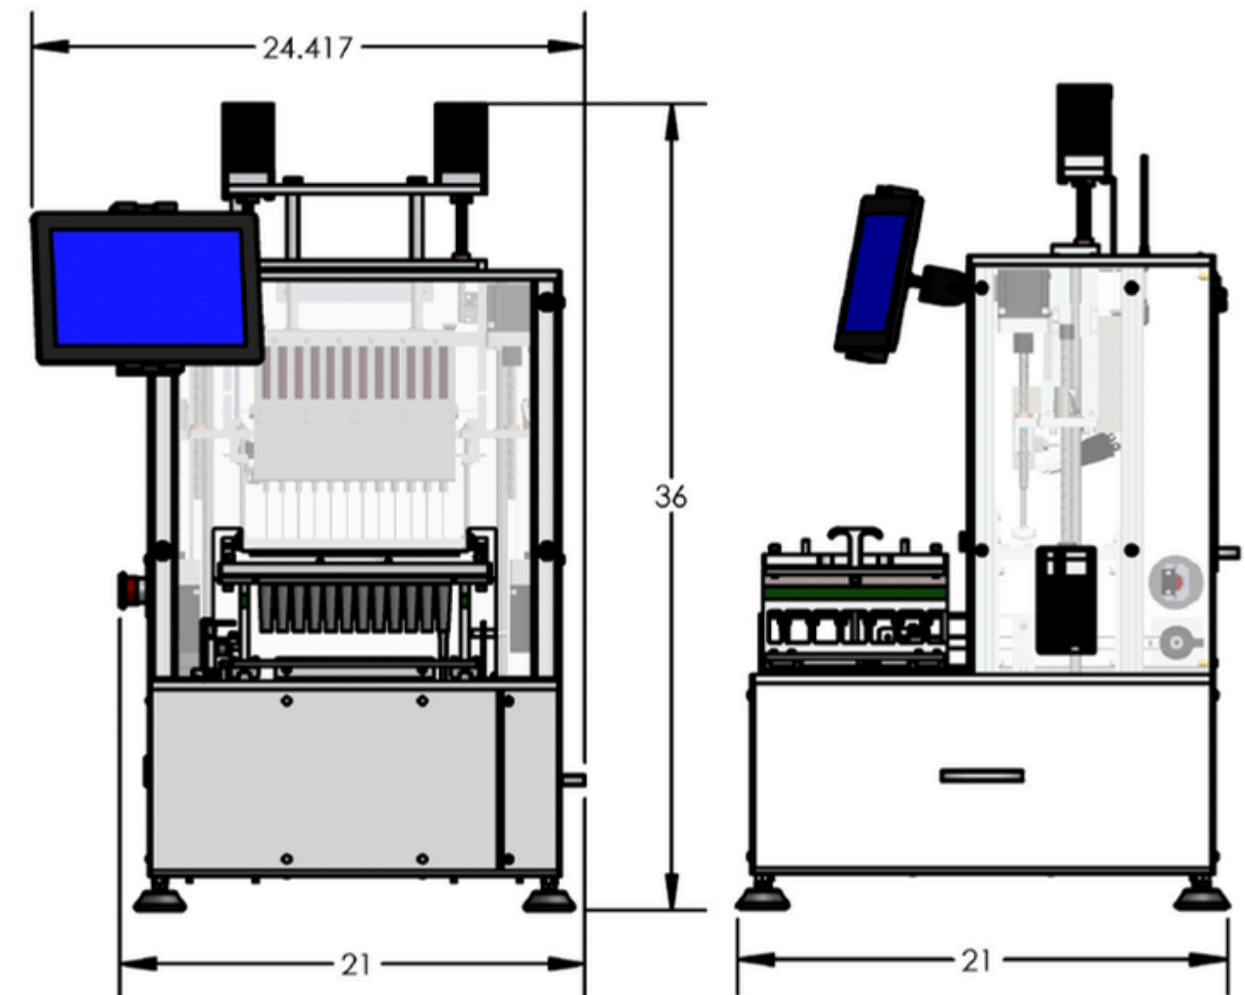

Precision & Repeatability

- Programmable 0.05–3.2 g concentrate dosing
- Temperature control up to 198°F
- 20 Preset Recipes + Unlimited Recipe Storage

Hash Hole & Infusion Control

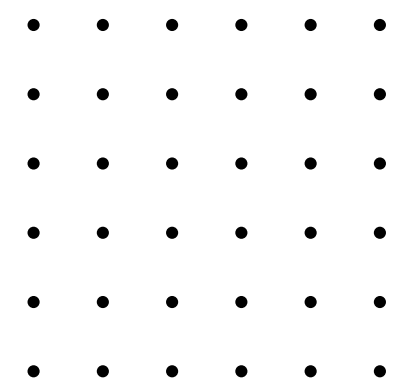

- Programmable concentrate core placement
- Control core start, stop and length
- 84–109 mm cone compatibility
- Rosin, live resin, distillate & other compatible concentrates

Self-contained • No nitrogen or compressed air required • 110V • 15 Amp
Results vary based on material and production settings.

\$69,000

Why Choose the Astro Infuser 2.0

Move Beyond Manual Infusion

Automate concentrate dosing and core placement instead of injecting pre-rolls one at a time.

Scale Hash Hole Production

Take hash holes and donut joints from labor-intensive production to commercial volume.

Repeat Your Best Products

Save dose, temperature and core-placement settings for repeatable production.

Run Multiple SKUs

Switch between concentrates, doses and infused pre-roll recipes without rebuilding the process from scratch.

Grow Output Without Growing Labor at the Same Rate

Increase infused pre-roll capacity with 12-point simultaneous injection.

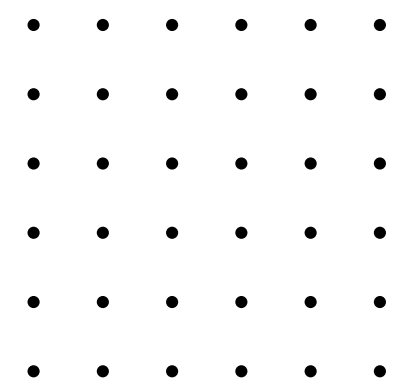

The Joint Has to Smoke Right.

“Excellent joint, smoked great. No runs, no canoes. Fantastic all the way through.”

David L. - Conscious Ventures LLC

More Than Faster Infusion

Control the Entire Core

Create repeatable hash holes, donut joints and infused pre-rolls with programmable control over the concentrate inside each pre-roll.

DOSE
Program the concentrate amount.

TEMPERATURE
Control heat for proper concentrate flow.

PLACEMENT
Control where the core starts and stops.

REPEAT
Save recipes and reproduce successful settings.
